**Reasons for Allowance:**

The following is an examiner's statement of reasons for allowance: the prior art does not teach or/suggest all of the limitation of the claimed invention including:

- gluing on the first surface of the collective plate-substrate a second plurality of chips, wherein each of the implantable device electric circuits has at least one corresponding chip,
- cabling each of said glued chips to an associated contact area,
- pouring a coating resin over the first surface of the plate-substrate, and forming a uniform thickness layer of coating resin,
- hardening the coating resin,
- mounting at least one SMC component and/or a connector element to the second surface of each individual substrate, to form the plurality of electric circuits of the implantable devices.

Accordingly, claims 1-3 are allowed.
